Google Workspace Add-ons

Our add-ons have passed the security audit verified by Google and certified 100% compliant with the Google API User Data Policy.

Help

Mail Merge for Gmail
Send personalized emails to your contacts, include unique file attachments, track emails and schedule messages.

Document Studio
Merge documents from data in Google Sheets and Forms. Automate contracts, invoices, agreements, and more.

Email Sheets on Schedule
Automatically email Google Spreadsheet reports and dashboards on a recurring schedule to your team

Google Forms Notifications
Send customized email notifications to form respondents and anyone else when someone submits your Google Form.

Google Drive Auditor
Run a complete security audit of your Google Drive and know who has access to your shared files and folders.

Save Gmail to Google Drive
Auto-download email messages and file attachments from Gmail to your Drive.

Gmail Address Extractor
Extract email addresses and names from Gmail folders and save the email list in a Google Sheet.

Download Tweets Forever
Search Twitter for your brand mentions or #hashtags and save the tweets permanently in a Google Sheet

Twitter Bots
Make your own Twitter bots that can auto reply to tweets, retweet tweets, send direct messages (DMs), follow users, add users to Twitter lists and more.

File Upload Forms
Receive large files from anyone in your Google Drive, accept e-signatures and notify form respondents

Email Studio for Gmail
Send emails on a recurring schedule, copy Gmail drafts, forward emails, auto-responders, purge old emails

Creator Studio for Slides
Turn Google Slides into animated GIFs and video slideshows. Sync presentations with YouTube videos

YouTube Video Uploader
Let anyone upload videos of any size directly to your YouTube channel with a simple web form

All products are designed and developed by Google Developer Expert, Amit Agarwal
